

FOR SALE: \$16,900
2008 Outfitter Apex 9.5

It will only fit a long bed (8ft) truck. 3/4 ton or more recommended for this camper. Apex highlights include:

- * basement for water tanks and batteries. This has the bonus of allowing an almost full height door for easy entry
- * large tanks - fresh water tank is 44 Gal
- * fully enclosed bathroom and shower
- * insulated Weblon soft wall from the marine industry
- * Aluminum frame.
- * Thick fiberglass vacuum bonded to the frame. The fiberglass panel used is not your typical filon, which is a thin sheet of fiberglass bonded to a cardboard backer. This cheaper style can delaminate. Outfitter uses a premium all fiberglass panel that is 5x more expensive than filon.
- * TPO plastic roof instead of rubber.
- * molded fiberglass lower tub, and cabover area. Very little wood is used other than for cabinetry.

Specific option on this camper include:

- * extended cabover
- * hide-a-bed pull out upper bunk drawer.
- * electric roof lift (can lift up to 400 lbs on the roof)
- * wireless remote control for jacks and roof
- * yakima racks on the roof for carrying kayaks/canoes
- * cassette toilet (can be emptied just about anywhere - you don't need a dump station)
- * 32 Gal grey water (16G std).
- * 2 fantastic fans - one over the bed
- * misc: outside speakers, LPG quick disconnect under sink for Cat type heater, extra 120V and 12V plugs, side outside lights, water heater bypass and siphon.
